

Caring for nature in places where you love walking will keep it special for everyone

Be kind to other path users by saying hello, on narrow path step to the side to allow others to pass.

Follow the **Scottish Outdoor Access Code** by taking care of the environment, acting responsibly, and respecting other people.

Do something to **improve path networks** for others, for example remove some litter, clean an interpretation panel or sign.

Help nature by taking part in a **citizen science survey**.
